EDUCATION

Mohammedia Engineering School

Master of science in Modeling and Scientific Computing

Rabat, Morocco

June 2016

Abi Darr ElGhifari High School

Bachelor's Degree major: Physics

Rabat, Morocco

June 2009

EXPERIENCE

Societe Generale Corporate and Investment Banking

Equity Pricing Developer

Casablanca, Morocco

Mar 2017 – present

- Developed a python application to automate and schedule batches of pricing requests (including output formatting & automatic reporting) of cross asset structured products, used by trading, pricing & sales teams.
 - Stack: Python 3, Flask, MongoDB, Pandas.
- Implemented Python wrapper modules and clients to wrap R&D APIs for use by pricing teams.
- Migrated legacy codebase to Python 3.

OCP SA

Software Engineer Intern

ElJadida, Morocco

Feb 2016 – June 2016

- Analyzed and performed a feasibility study of software solutions for waste dispersion modeling.

Societe Generale Sogecapital Asset Management

Software Developer Intern

Casablanca, Morocco

June 2015 – Aug 2015

- Developed an application using Python, Pandas, Numpy & SQLAlchemy to monitor financial ratios used in financial analysis.
- Designed a tool using Python & Javascript to automate weekly reporting.

PROJECTS

Batch Pricing Project

Aug 2017 - Present

- Implemented logic and database managers in an object oriented approach.
- Developed and integrated Python clients for R&D pricing web APT's.
- Automated generation and delivery of marketing templates.
- Used Jenkins pipeline for the CI/CD of the project

Email Pricing Service

Mar 2017 – Aug 2017

- Developed an external email based pricing API used directly by clients to price equity structured products.
- Implemented generic products mapping system. (using anticipated implementation of Python 3.7's data classes (PEP 557))

SKILLS
